Instruction for Use

Surgical Suction Probes (Sets):
Suction probe range of devices are hand-operated, single use, and are used as a conduit to remove bodily fluids and secretions, surgical tissue debris, irrigation fluids and gasses. They are used in surgical sites and body cavities to facilitate observation and/or to clear an obstruction. To be used on all patient populations by clinicians and trained healthcare workers, in clinical settings, homecare and emergency settings.

Instructions for Use:
- Remove Suction Probe from packaging.
- For Suction Probe Sets check all contents are present and the suction device is securely attached to the connecting tubing.
- With the suction source switched on, insert the male connector end of the suction device into female end of connecting tubing.
- Ensure the suction device is securely connected to the connecting tubing.
- If using device with vacuum control, use finger to cover vent to control suction.
- If you experience problems using the device, contact your healthcare professional for advice. Serious incidents that occur in relation to the devices intended use, should be reported to the manufacturer and local competent authority.

Caution: FOR SINGLE USE, DO NOT REUSE, STERILE DEVICE.

Warnings:
- Pennine Surgical Suction Probes devices should not come into direct contact with the heart or the central circulatory system (CCS) or the central nervous system (CNS) as it is not intended for this application and may cause injury to the patient.
- Do not use if damage observed to packaging or product or if packaging is open prior to use as the device as it compromises the sterility of the device and/or may not perform as intended or cause infection to the patient, user or other.
- Do not use if you observe any damage to, blockage or foreign bodies in the device as the device may not perform as intended or cause injury to the patient, user or other.
- For Suction Probe sets do not use if you observe any leaking in the suction tubing as this may reduce the suction of the device therefore non-performing as intended.
- Keep excess suction tubing loosely coiled and out of the way to prevent trips and falls and this may cause injury to the patient, user or other.
- Device is intended for transient use. Do not use for longer than 15 minutes as the device may not perform as intended.
- Do not use the device past its expiry date as the device may not perform as intended.
- Device is intended for single patient use.
- Do not reuse device as there may be a risk of infection to patient, user or other and the device may not perform as intended.

SMT 0198 - Rev 6 - 17 JUN 2022

Storage and Disposal:
- Store in a clean, cool, dry place away from direct sunlight.
- Dispose of as clinical waste in-line with local and Government guidelines.
