3M[™] Tegaderm[™] Transparent Film Dressing First Aid Style 1620, 1621

Product Description

Tegaderm™ Film consists of a thin film backing with a non-latex, hypoallergenic adhesive. Tegaderm™ Film with Border is notched and reinforced with soft cloth tape to provide a better seal around catheters and other devices. The dressing is breathable, allowing good oxygen and moisture vapor exchange. It is waterproof and impermeable to liquids, bacteria, and viruses.* An intact dressing protects the site from outside contamination.

*In vitro testing shows that the film of Tegaderm™ and Tegaderm™ HP dressings provides a viral barrier from viruses 27 nm in diameter or larger while the dressing remains intact without leakage.

Indications for Use

Tegaderm™ Film can be used to cover and protect catheter sites and wounds, to maintain a moist environment for wound healing or to facilitate autolytic debridement, as a secondary dressing, as a protective cover over at-risk skin, to secure devices to the skin, to cover first and second degree burns, and as a protective eye covering. Do not use the dressing as a replacement for sutures and other primary wound closure methods.

Warning

Using the Tegaderm dressing to cover a drug delivery patch could lead to faster absorption, increasing

Precautions

- Stop any bleeding at the site before applying the dressing.
- 2. Do not stretch the dressing during application as tension can cause skin trauma.
- Make sure the skin is clean, free of soap residue and lotion and allowed to dry thoroughly before applying the dressing to prevent skin irritation and to ensure good adhesion.
- 4. The dressing may be used on an infected site, only when under the care of a health care professional.
- Antimicrobial ointments containing polyethylene glycols may compromise the strength of the Tegaderm™ HP Transparent Film Dressings.

Shelf Life: For shelf life, refer to the expiration date on the package.
